## **YOUR CO-PAY**

This document is being provided as an educational tool. As your healthcare provider, we want you to know the following things about your insurance.

- If your insurance requires a co-pay, we are required to collect it.
- If you do not pay your co-pay, you are violating your insurance contract.
- If we participate with your coverage, (i.e. reduce the cost of services to you by agreeing to your insurance company's charge), we must collect the co-pay before each visit. This is a requirement of our agreement with your insurance company.
- If we violate our participation agreement and are not allowed to participate with your insurance company, the cost of services to you will rise.
- **Effective immediately, we will begin rescheduling visits if your co-pay is not paid at check in.**

Your co-payment was designed by your insurance company to assist in covering the cost of providing healthcare to you. You are required to pay it. We are required to collect it. We will be collecting it before services are rendered. You will be rescheduled if you do not pay it.

**Thank you for your cooperation !**
